**Quebec.** City, river port and capital of Quebec Province, and the third city in point of population in the Dominion, is situated on a promontory, culminating in Cape Diamond, 333 ft above the level of the river, on the left bank of the St Lawrence, at the junction of the St Charles 400 mls from the sea, and 180 mls n-e of Montreal. Lat 46° 49′ 6″ N, Long 71° 13′ 45″ W. Pop (1881), 62,446. The city is divided into Upper and Lower Towns, the former occupying the highest points of the promontory, and being strongly fortified, and the latter lying around its base and along the banks of both rivers. To the s-w of the Upper Town lie the Plains of Abraham, where a column 40 ft high has been erected on the spot where Wolfe fell in 1759. In one of the squares of the town there is also a monument erected to the memory of the English and French generals, Wolfe and Montcalm. The streets are generally irregular and narrow, and some of them are very steep. Most of the houses are built of stone or brick, and are topped by quaint-looking roofs, covered with tinned iron or shingle. The Lower Town, which is the commercial quarter, is built around the base of Cape Diamond, where in many cases the rock has been cut away to make room for the numerous warehouses and wharves that stretch along the banks of both rivers, and there being ample depth of water, vessels of the largest size can be floated alongside the wharves. The city receives a copious supply of water from Lake St Charles, 9 mls distant, and situated several hundred feet above the highest level of the town. Quebec contains numerous churches of various denominations and educational institutions of a high order. Among the public buildinge are the Provincial House of Parliament, the R C Cathedral, the Epis, Pres, Meth, Bapt and other churches, Laval University, the Grand Seminary, the Minor Seminary, Ursuline Convent, Morrin College, Laval, Normal and Model schools, Quebec high school, the Literary and Historical Society, the Marine Hospital, the General Hospital, the Lunatic Asylum, etc, etc. The manufactures include iron castings, machinery, leather, boots and shoes, paper, tobacco, etc. There is also a very extensive export trade in lumber. The city returns 3 members to the House of Commons and 3 to the Provincial Legislature, Quebec was founded by Champlain in 1608. It fell into the hands of the English in 1629, but was restored to the French in 1630. Subsequently it was retaken by General Wolfe in 1759, and has since remained in British possession. Pop, 65,000. Tel, GNW and CPR. Telephone, Bell. Exp, Can and Dom. A G Tourangeau, p m.

**Valleyfield** is situated at the head of the Côteau Rapids and foot of Lake St Francis, on the s s of the St Lawrence, and also on the CA and GT Rys, in the co of Beauharnois. It was inc as a town in 1874. This town possesses an extensive water power, the fall of water being 15 ft, coming from an expansion of the River St Lawrence, 35 by 5 mls. On account of this unlimited power and owing to the total absence of floods caused from backwater, large mills and manufacturing establishments have been located here. Valleyfield, being about 40 mls from Montreal, is becoming a centre of considerable importance. Here is located the Montreal Cotton Co's extensive factory, turning out 80 different varieties of cotton; A Buntin's paper mill, turning out 16 tons daily; 2 flouring mills fitted up with the latest improved machinery; 2 saw mills and sash and door factories; 1 canning factory; a soda water factory, and several smaller industries. It has a Circuit Court, 2 banks and a newspaper published in the locality. Tel, GNW. Exp, Can. Telephone connection. Pop, 6,000. Daniel Dion, p m.

THE LATEST IMPROVEMENT IN

## Harness Sewing Machines

The New Standard, Lock-Stitch, Wax Thread,

HARNESS SEWING MACHINE!

The only machine sold in the United States which, with Waxed Thread, makes the Double Thread, Lock-Stitch. Alike on both sides, and pronounced by some of the best Harness Manufacturers in the United States, "EQUAL TO HAND SEWING."

Suitable for all grades of Harness, in Plain, Raised and Waved Sewing. Uses Threads from 3 to 10 Cords, Stitching from 5 to 14 to inch, with either Dry Thread, or Solution or Hard Wax. Specially suitable for Custom Shops. No special knowledge required to operate successfully. References permitted to some of the leading Harness Manufacturers in the United States. Send for samples of Work, Catalogue and Testimonials. **JOHN O'FLAHERTY**, P.O. Box 1324, **Montreal, Canada, Sole Agent for the United States and Canada.**
